Summary

Software Engineer with professional experience building scalable enterprise systems using Python, Django, Django REST Framework, PostgreSQL, Redis, and Celery. Strong background in API architecture, asynchronous processing, database optimization, authentication systems, and performance tuning. Proven success delivering production-grade HRMS platforms serving 30K+ users with secure, maintainable, and high-performance solutions.

Experienced in AI-assisted development, leveraging modern coding tools to accelerate implementation, code analysis, debugging, and software delivery.

Work Experience

Brite
Dec 2025 – Present

Software Engineer (Backend) — *El Sheikh Zaid, Giza, Egypt (Hybrid)*

- Developing and maintaining a production-grade HRMS platform serving 30K+ users across employee lifecycle operations.
- Built scalable RESTful APIs using Django REST Framework for modules including Employees, Attendance, Leave, Payroll, Recruitment, Performance, Notifications, and Reporting.
- Designed secure role-based access control (RBAC), authentication workflows, and permission systems for multi-role enterprise environments.
- Implemented asynchronous background jobs using Celery and Redis for scheduled processes, notifications, and heavy operations.
- Led migration of 10 unmanaged background schedulers to Celery Beat and systemd services, reducing server RAM usage by 72% and eliminating duplicate task execution.
- Optimized notification processing pipelines, reducing execution time from 60+ seconds for 1,000 records to 3–5 seconds for 10,000 records.
- Improved PostgreSQL query performance through indexing, query refactoring, and ORM optimization.
- Integrated third-party services and contributed to backend architecture decisions for scalable growth.
- Deployed and maintained services within Azure-based production environments.
- Leveraged AI coding assistants to analyze existing codebases, implement features across backend, troubleshoot issues, and improve development efficiency.

Opream & Expotech
Jul 2024 – Dec 2025

Full Stack Python Developer — *Remote*

- Contributed to backend development with Django REST Framework, implementing secure role-based APIs.
- Developed interactive frontend modules using React.js and TailwindCSS with focus on responsive design.
- Built and maintained scalable backend services with Django and PostgreSQL.
- Integrated third-party APIs and optimized database queries for performance.

Freelance
2023 – 2024

Software Engineer (Full Stack) — *Remote*

- Developed full-stack web applications using Python, Django, Django REST Framework, React.js, Next.js, and PostgreSQL.
- Built projects including AresModz, Dynamic Clinic Management System, and Sho8l Fnadeek, covering backend APIs, authentication, role-based access, and responsive frontend interfaces.
- Designed and integrated RESTful APIs with modern frontend applications, focusing on maintainability, performance, and user experience.

Technical Skills

Languages: Python, JavaScript, Bash, HTML5, CSS3

Backend: Django, Django REST Framework, Flask, REST APIs, JWT, RBAC

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL, SQLite

Infrastructure: Redis, Celery, Azure, Linux, Git, GitHub, Docker (Basic)

Concepts: OOP, SOLID Principles, Performance Optimization, Scalable Systems, Agile, Scrum

AI-Assisted Development: Cursor, GitHub Copilot, AI Coding Agents, Codebase Analysis, AI-Assisted Debugging

Projects

Seeker – Job Search Platform *Full Stack*

- Built a full-stack job search platform using FastAPI and Next.js, integrating a modern frontend with RESTful backend APIs.
- Implemented job discovery, job details, saved jobs, notifications, search management, hiring posts, and user account features.
- Deployed the application to a cloud environment and configured the production frontend and backend services.
- Leveraged AI-assisted development tools to accelerate full-stack feature implementation, code analysis, and debugging across FastAPI and Next.js.

Mentora – E-Learning Platform

- Built a responsive multi-role platform (Student, Teacher, Parent, Admin) with advanced access control and JWT/OTP authentication.
- Developed interactive UI using React.js, Vite, and TailwindCSS.
- Implemented course management, scheduling, and H5P interactive learning content.
- Contributed to backend APIs using Django REST Framework.

Dynamic Clinic Management System *Private Repository*

- Developing a clinic management platform using Django REST Framework and Next.js.
- Implemented appointment scheduling, prescriptions, dashboards, and role-based authentication.

AresModz - E-commerce Platform *Private Repository*

- Building frontend experience for gaming e-commerce platform using React, Vite, and Next.js.
- Focused on product browsing, responsive UI, and performance optimization.

Internships

Information Technology Institute (ITI) **Jan 2024 – Jun 2024**
Full Stack Python Development Track *BeniSuef, Egypt*

- Built full-stack applications using Django and Flask with security best practices.
- Developed responsive frontend interfaces using React.js and Redux.
- Worked in agile teams using Git workflows and sprint planning.
- Designed and consumed RESTful APIs between frontend and backend systems.

Education

Faculty of Islamic and Arabic Studies, Al-Azhar University **Sep 2023**
Bachelor's Degree in Islamic and Arabic Studies *Sharqia, Egypt*

Languages

Arabic: Native

English: Professional Working Proficiency
